Smart Tourbillon twatch

The World's First Tourbillon Movement Smartwatch

This is the world's first Tourbillon smartwatch. With its innovative design concept and process technology, based on the process of the traditional tourbillon movement, it integrates electronic components, adds intelligent functions, and skillfully integrates machinery and intelligence to design the world's first tourbillon intelligent movement. Equipped with an exclusive customized ring LCD screen and ultra-low power consumption technology, it has a 120-day-long endurance blessing, which combines the mechanical beauty of the tourbillon and the convenience of the functions of the smartwatch.

The First Smart Tourbillon Movement Combines Function and Beauty

The movement is 8.5mm thick, inlaid with a tourbillon, and meticulously polished. It is made with traditional technology, so this movement ensures the exquisite mechanical watch shape that can be diversified in the later stage of the watch. The tourbillon is hand-winding. It can run for more than 36 hours at one time. The rotation cycle of the tourbillon is 60 seconds/circle, which can be used for independent stopwatch indication.

Exclusive Customized FSTN LCD Screen Protects Eye Health

The exclusive customized ultra-thin ring FSTN (Formulated Super Twisted Nematic) LCD screen enhances the contrast of the black-and-white display. Especially in the harsh sunlight, it's more clear. Furthermore, there will be no flash screen under any brightness conditions (such as backlight), and the display screen will always remain clear and smooth, minimizing eye tension and fatigue and effectively protecting eye health!

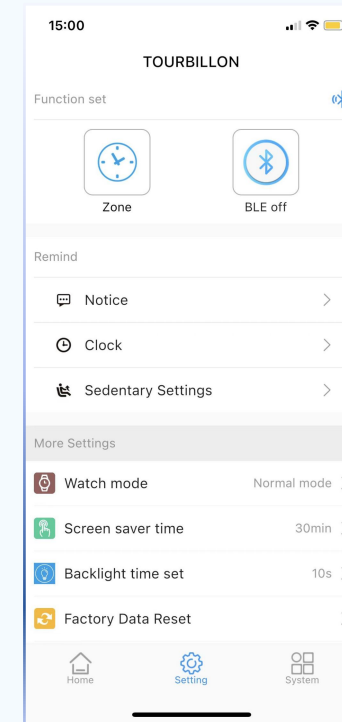

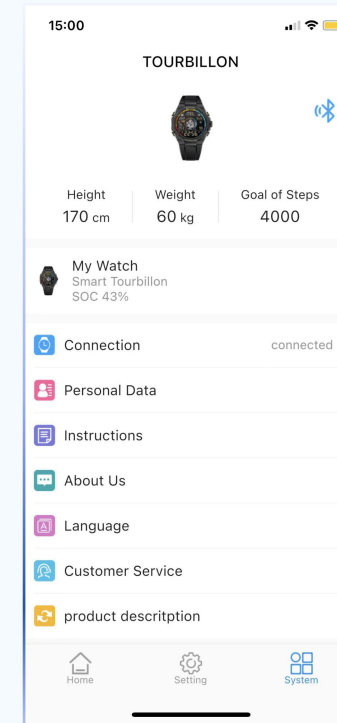

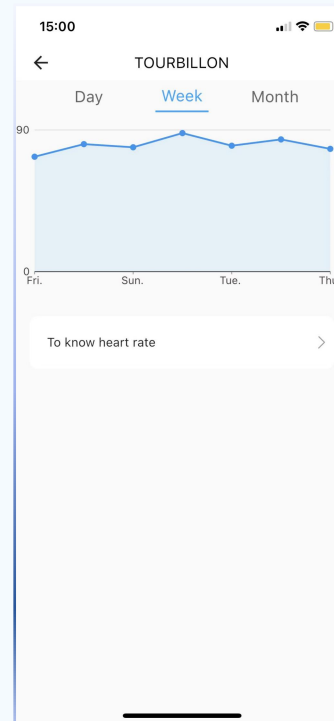

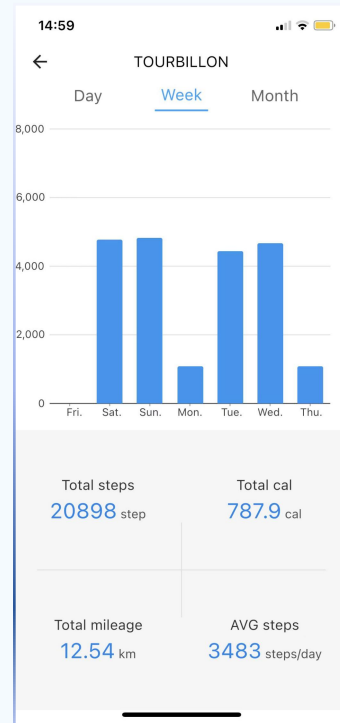

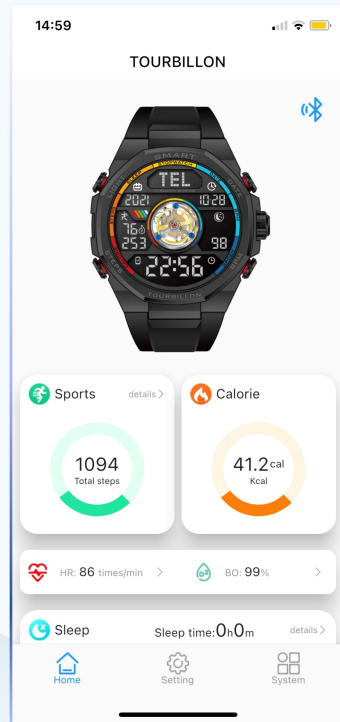

Intimate Multifunctional Design

This watch supports a 24-hour time display, calendar, timer, alarm clock, etc. It includes a number of professional sports modes and can record daily activity data as well as monitor sports data in real time. It also helps detect blood oxygen, heart rate, and other functions

Light Business	 Second time zone	 Date	 Calendar date	 Stopwatch
Light Sport	 StepS	 Calorie		
Health	 Heart rate	 Blood oxygen	 Sleep	
Remind	 Call	 SMS	 Alarm	 Sedentary  Low battery

Compatible with Android and IOS systems

This watch is compatible with Android and IOS systems. It can be connected to the mobile phone through low-power Bluetooth, update time, set functions, view detailed sports data, and upgrade

5ATM Waterproof to Break Through the Scene Limit

The waterproof performance of this watch is as high as 5ATM, which is among the best in the industry for a tourbillon mechanical watch. It can not only withstand splashes from washing hands, faces, showers, and so on, but it can also bathe with a watch and scrub with a small amount of cold water to meet users' daily wearing needs.

Long Battery Life, High-efficiency and Energy-saving

The deeply optimized FreeRtos system, in conjunction with an ultra-low power MCU, significantly reduces the power consumption of watch operation. A single charge can last up to 120 days. Users can choose between normal mode, power saving mode, and super power saving mode to meet their specific needs, effectively eliminating endurance anxiety.

120 Days
Ultralong endurance

Harmonious & High-end Styling Design

Seven-color chromatic circle dial, two-color buttons, and red waistline exude infinite vitality, showing the true color of youth trend business. The central tourbillon structure, combined with 316 stainless steel, a sapphire glass mirror, and advanced technology, is sturdy and durable. The watch strap is made of fluororubber material, which is soft and long-lasting. With the moderate thickness, it fits with the wrist immediately, creating a comfortable wearing experience.

Humanized Visual Presentation Design

The interface operation guide is a large color symbol in this interface. Well-defined function keys and simple function operation, with few steps and many instructions, allow users to understand the information and complete the interaction faster.
