

ABOUT US

Bergamot has been a pioneer in design and delivery of products to support people in the workplace - performing better and safer. Through our collaborators' comprehensive researches and more than 25 years' experience of distribution, we determine our customers' needs and develop innovative solutions.

Proud of our great past, we are working towards an even greater future. At Bergamot, we are driven by what we believe in: efficiency, quality and customer satisfaction. We are moving forward, generating creative ideas, consulting a wider group of stakeholders, and forming new strategic partnerships to offer a service that goes beyond product, surpassing normal expectations. We are going the extra mile, by redefining our products, our services and our business model.

Bergamot recognises and responds while continuously adapting to new business environment. We assist, recommend and get what customers need – when, where and why they will need it. A significant investment has been allocated to upgrade our IT infrastructure allowing us to provide outstanding support for our customers and facilitate one-to-one dialogue between them and our knowledgeable and experienced team pertaining on the disposable products selections.

We appreciate that the world is evolving at a greater pace than ever before. Hence, our team is well prepared for future challenges and undertakings with our aspiration, optimism and the determination – we believe that's the winning combination for our customers, our partners and, ultimately, for a safer and better world of work.

WHY CHOOSE NITRILE ?

Nitrile examination gloves provide better tear and puncture resistance compare to others.

For some reason, nitrile examination gloves are highly recommended for some users who have sensivity level on certain substances such as protein or latex.
