COFFEE BEANS

ROASTED COFEE

COCOA

COCOA BEANS

The cocoa bean is one of the most important agricultural export products of Indonesia. In the past 25 years, the Indonesian cocoa sector has experienced massive growth, driven by rapid expansion of smallholder farmer participation. Indonesian smallholders contribute - by far - most of the national production, thus outperforming big state plantations and large private estates. The country currently has approximately 1.5 million hectares of cocoa plantations.

COCOA POWDER

COCOA BUTTER

PALM

Palm oil is an industrial plant as a raw material for producing cooking oil, industrial oil and fuel. Indonesia is the largest producer of palm oil in the world and also is the world's leading exporter of palm oil. However, which exported the majority of the palm oil it produced, Indonesia is also one of the world's largest consumers of palm oil, using it as both edible oil and in biofuels.

CASHEW NUTS

Most of Indonesian cashew nut grow in highly fertile soils because they belong in volcanic area. The soils also contain iron oxides and aluminium oxides, so it gives best performance for cashew production and nutrition inside. Harvest seasons of cashew in Indonesia like a party. The ground level is covered by thousands of cashew nuts falling on and it could not be accommodated by farmers who are overwhelmed by the harvest.

WOOD PELLETS

Wood pellets as alternative fuels are produced using wood waste raw materials without chemicals added in the manufacturing process.

Our wood pellets is natural solid fuel with no chemical substances, allergy-free, lower ash (compared to coal) and is considered carbon neutral. To ensure the quality of our wood pellets, we diligently select and curate the raw materials using mainly albizia chinensis, shorea and mahogany obtained from local industries' wood and timber waste.

*On analysis of our Wood Pellet sample, the results were obtained from Sucofindo, a state-owned surveyor company in Indonesia. All the tests and certificates are for indication only. It might vary from time to time.

COMPOSITIONAL ANALYSIS

Type	Tropical Mixed Wood
Diameter	8mm
Length	30-45mm
Total Moisture	6,47%
Gross Calorific Value	4,401 - 4,702 kca/kg
Total Sulphur	0,04%
Chloride	0,04%
Ash	1,03 - 1,23%
Fixed Carbon	18,96 - 19,14%
Bulk Density	591,49 Kg/m3
Potassium Dioxide	0,07%
