# Co-extruded Composite Decking

Co-extrusion, the latest technology in wood composite range, this advanced cap technology is co-extruded to core, its capped surface material is what gives eachboard their unique and superior performance. The insulating properties of cap make co-extrusion board extremely stable. The surface will not expand and contract like other composites, meanwhile its low heat absorption means bare feetwill love it. Plus its high UV stability its inherent color will last for years. Lisen' s co-extruded board achieves an infinitely variable and authentic color finish, comparing only to nature timber. This advanced and innovative technology allows forincredible color blending, providing one of the best looking composite boards.
