ASAF ATELIER WOOD ART

WHAT DO WE DO/MAKE...?

Our company, which offers handcrafted and meticulously designed furniture products, stays away from industrial materials and produces in its 2600 m2 factory located in Gölbaşı Karşıyaka with the highest level of craftsmanship.

We carefully and meticulously produce tables, coffee tables, sideboards, book-cases, and shelves, emphasizing the natural characteristics of walnut wood to offer our customers a combination of aesthetics and functionality.

Our main preference is walnut wood; we make this choice in order to offer our customers quality products with the durability, color richness, and beauty of the natural patterns of the walnut tree.

We bring together aesthetics and durability by using natural and high-quality woods instead of industrial materials such as MDF and chipboard in our products.

WHAT DO WE DO/MAKE...?

Our company collaborates with many artists who train talented artists in the fine arts faculties of universities.

Another goal of ours is to bring people together through workshops organized by our artists, allowing them to have a pleasant time with us. In these events, while the participants create successful works under the guidance of our artists, we aim to provide them with an opportunity to spend their stressful times in a more peaceful environment with artistic activities, in an atmosphere of warmth, smiles, and sincerity.

Our painters, in particular, create original drawings on walnut trees while maintaining a certain level of artistry. We transform these drawings into coffee tables, sideboards, and other furniture items, integrating art into our daily lives. In this way, we not only offer an aesthetic experience but also add functionality to art, providing our customers with unique and special products.

ASAF ATELIER WOOD ART

OUR STORY

Our story;

Started with our love for trees... Our goal is to be able to convey to people the unique design of nature and to show them that naturalness and simplicity are the best design.

For this reason, we have formed a great team of interior architects, sculptors, designers, iron, stone and wood craftsmen.

We develop ideas and projects to present to you our main theme, the tree, in its simplest form. We cooperate with the universities' fine arts faculties and ensure that our products are made by artists. Above all, we are proud to support our art students as part of a social project.

In short: We produce and create values in the name of our country with the strong combination of art and craft.

We created designs based on the harmony of three basic raw materials: wood, iron and stone... We wanted all our designs to be handmade and therefore avoided being industrial.

Who are we?

We: Interior architects, sculptors, designers... artists from the faculties of fine arts... iron (metal) masters, wood (wood) masters, stone masters... In short, we are a team of designers, artists and craftsmen.

What do we do?

We produce specially designed furniture assuming the tree is left in its most natural state.

Trees are like fingerprints. The natural patterns, connections and looks on the solid wood table we produce are unique. For this reason, every product designed will be unique and specific to you. Everything natural is valuable...

We hope you will be special with our unprecedented and unique designs like fingerprints. We create and realize designs inspired by nature and bring our designs to life together with our artists and masters.

We wish you to stay plain and strong...
