WELCOME TO DIVINE SALES CORPORATION

At Divine Sales Corporation, we are committed to excellence in manufacturing, innovation, and customer satisfaction. We take immense pride in our journey, which began with a vision to deliver top-quality Carrying Rollers and Other conveyor accessories to industries across the globe.

Products We Are Dealing

➢ Carrying Rollers

The Rollers are very important component of belt conveyor. They are present along the entire Length of the conveyor, support the belt and moving the materials loaded on the belt. The diameter of the idler could be correctly selected according to the belt width and Travel speed. We produce Ø 60mm, Ø 63.5mm, Ø 76mm, Ø 89mm, Ø 102mm, Ø 114mm, Ø 127mm, Ø 139mm, Ø159mm. They almost cover all belt width requirement General steel Roller consists of idler shell, spindle, bearing, bearing house, seals Equipment and axial fixed unites.

Product Characteristics;

> Steady running, reliable quality and reduce maintenance;
> Less movement longitudinally, rotating smoothly, extends the life span;
> Various bearing housing and sealing structure are available for the customer's choice;
> Multi pass labyrinthine sealing, preventing the mixed dirt and water immersed;
> Manufacturing by steel pipe especially for of high precision roller, ensuring the strong load, low shaking and less noise.

➢ Conveyor Idlers Set

Conveyor Idlers are used to carry or convey conveyor belt loaded with bulk material. These carrying idlers are fabricated from different materials such as heavy gauge steel tubing or seamless steel tubing, depending upon the requirement and their applications. These idlers are specially designed to provide smooth transition of bulk material for long period of time and are available with impact rings made of special shock absorbing compound.

Toughing idlers are use for conveying bulk materials, and are designed and manufactured with Toughing angels of 20° and 30° normally. Idlers of 45° trough angle or any other angle are

also manufactured as per customer's design and drawings. We can also design manufacture and supply 5 rollers type idlers. Mounting brackets are manufactured out of standard steel sections to have rigidity and stability of the frame. Shafts are manufactured out of Carbon steel bright steel bars suitable for any torsion load and bending movement.

➢ Impact Rollers

Rubber disc idlers are known as Impact Idler fitted with rubber rings made from natural / Synthetic / Neoprene material. The fixing arrangement and dimension of rings are suitably design for easy replacement and interchangeability which protect the belt by absorbing impact at loading point. The Thronging angle is 20° or 30°

➢ Return Rollers

Using the international standard designing and manufacturing technology, our company has improved the designing and production ability to a higher level. The Rollers produced here enjoy minimum revolving resistance, long life; small maintain work and high load capability.

Our company adopts special fine welding steel pipe for Roller, and does puncture processing in the tube. The roundness is controlled in special tolerance scope. The axle is according to standard tolerance and manufactured by fine cold drag steel. The bearing housing has been manufactured after stamping many times by the cold griped steel. The Roller shell and bearing housing have been welded together by the automatic welding machinery hand. Then it forms a whole high strength structure.

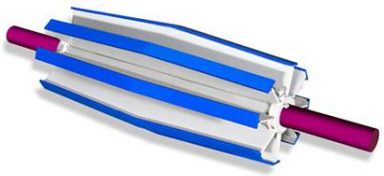

The bearing, which uses the world famous brand, is the big roving crack, deep groove ball and double sealing bearing. The above technical conditions can guarantee the Roller enjoy 10000-15000 hours of working life.

At present, the Roller series products include the carrying Roller, the return Roller, the impact Roller, the training Roller, the spiral Roller, the Roller with rubber rings, etc.

Product Characteristics
1) Stable running, good quality, free maintenance.
2) Small vibrating and long lifespan.
3) The flexibility of sealing methods.
4) Several labyrinth seal achieve dustproof and waterproof.
5) High accurate steel pipes ensure the rollers with low vibration and noise.

➢ Head Drum & Tail Drum Pulley

We are providing Conveyor Pulleys that are appreciated by the clients for continuous operation, increased bearing life and less power consumption. In order to offer quality Conveyor Pulleys, we use heavy tubes fabricated from steel plates to manufacture the shell. Further, the pulley shafts are made up of carbon steel machined with proper bore and key way. We are also capable of offering taper lock bushings along with our range of Conveyor Pulleys. The pulley drum is grooved with rubber lagging properly to resist slippage and the shafts are Equipped with anti-friction self-aligning ball bearings.

About DIVINE SALES CORPORATION

Our Story

At Divine Sales Corporation, we are committed to excellence in manufacturing, innovation, and customer satisfaction. We take immense pride in our journey, which began with a vision to deliver top-quality Carrying Rollers and Rope Making Machines to industries across the globe.

Our Mission

Our mission is to be a trusted partner in the industrial world, providing efficient and reliable solutions that streamline operations and enhance productivity. We are dedicated to empowering our customers with high-quality equipment and unparalleled support.

Quality and Precision

We understand the critical role that Carrying Rollers and Rope Making Machines play in various industries. To ensure the highest standards of quality, our products are crafted with precision and attention to detail. We take pride in the durability, efficiency, and performance of our machines.

Innovation and Technology

Divine Sales Corporation is at the forefront of technological advancements in the industry. Our team of engineers and designers continuously work to improve and innovate our products. We believe that embracing cutting-edge technology is the key to meeting the evolving needs of our customers.

Customer-Centric Approach

We are committed to building lasting relationships with our customers. Our customer-centric approach means that we listen to your needs and provide tailored solutions. We offer comprehensive support, including installation, maintenance, and after-sales service.

Global Reach

With a growing presence in the global market, Divine Sales Corporation is known for its reliability and excellence. We have successfully delivered our products to various countries, and our commitment to quality knows no borders.

Environmental Responsibility

We take our environmental responsibilities seriously. Our machines are designed to be energy-efficient, reducing the environmental footprint of our customers' operations. We also engage in responsible manufacturing practices to minimize waste and promote sustainability.

Join Us on the Divine Sales Journey

We invite you to join us on our journey of innovation, quality, and customer satisfaction. Whether you are in need of Carrying Rollers, Rope Making Machines, or comprehensive support for your industrial operations, Divine Sales Corporation is here to serve you.

Thank you for considering us as your trusted partner in industrial solutions. We look forward to working with you to meet your needs and exceed your expectations.

Our Valuable Customers...

- **UNITED INFRACORE LIMITED, JAJPUR, ODISHA**
- **HAARISH EQUIPMENTS PVT LTD, PITAHMPUR, DHAR, MADHYA PRADESH**
- **LION ENGITECH PVT LTD, BUTAL, GUJARAT**
- **MAXWELL CRUSHTECH, CHATTRAL, GUJARAT**
- **VEREX PROTECH ENGINEERING WORKS, UDAIPUR, RAJASTHAN**
- **RATNAKAR ISPAT INDIA PRIVATE LIMITED, BHILWARA, RAJASTHAN**
- **BASA BUILDCON, PITHAMPUR, MADHYA PRADESH**
