Black Galaxy Granite is mostly black with small gold or white flecks granite quarried in India. Known for its beautiful look and striking finish, Black Galaxy Granite is well known for its stain-free merits. Its name flawlessly describes this stone, as its golden flecks are suggestive of an ever-expansive galaxy.

Steel Gray OR Silver Pearl Granite has a medium grey background with a pebble effect within throughout the surface. Randomly present irregular veins provide a strong contrast to the stone. It is a hard stone, course grained, ideal as a granite worktop, this granite is one to use for almost any of your project.
