

LIYANG HONGYANG FEED MACHINERY CO.,LTD

LIYANG HONGYANG FEED MACHINERY CO.,LTD

LIYANG HONGYANG FEED MACHINERY CO.,LTD

Company Profile

Liyang Hongyang Feed Machinery Co., Ltd. ,Founded in 2006 ,Is specialized in pellet die、flat die manufacturing, it has rich expereince and advanced techonology in manufacturing dies for poultry feed, fish feed, shrimp feed, cat litter pellets ,cattle feed, wooden pellet, fertilizer pellet and etc. We choose good quality raw material for our dies, which is same as European material, with automatic drilling machines and advanced technology, dies working life is increased.

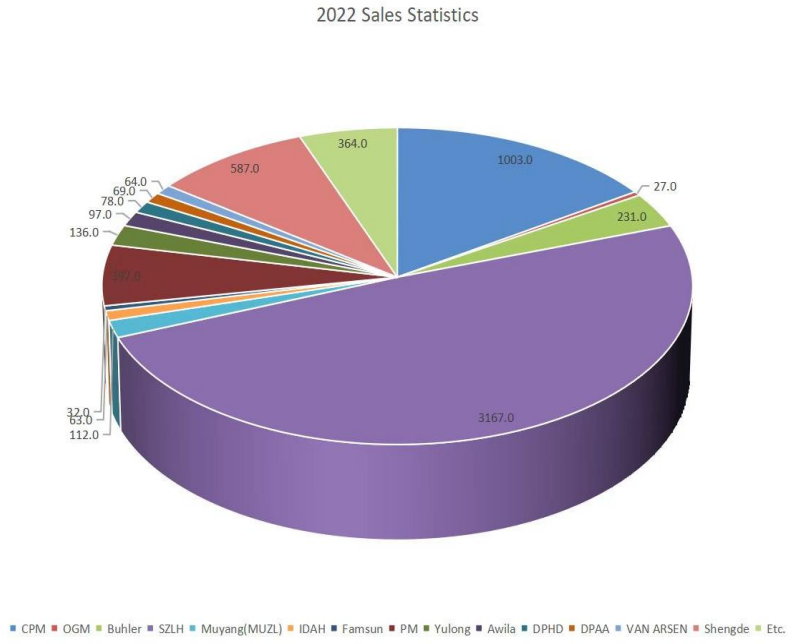

we manufacture all kinds of dies and roller shells for different kinds of pellet press, such as CPM、OGM、FAMSUN、ZHENGCHANG（SZLH）、Buhler、Van Aarsen、UMT、Andritz、PTN, etc. All of the feed processing machinery spare parts are also provided.

With strict quality control management, we have one good and strong team from the design and raw material checking to processing, heat treatment and packing.

HONGYANG manufactures all type dies and roller shells with high standard production procedures, dies and rollers are manufactured from special, high quality steel, and all materials are analyzed before process. In order to guarantee the die hole quality and die working life, all of dies are processed with Full-automatic CNC gun drilling machine processing and the drilling bits we use are also imported from Germany to to give a high quality finish and optimal performance.

Now we have sold our dies not only to domestic market but also to other countries, such as Vietnam, Philippines, Russia, Indonesia,Thailand, Malaysia, Indonesia, Bangladesh, India, Pakistan, Syria, Iran, Egypt, Oman, Senegal, etc.

BUSINESS SCOPE

RING DIE

ROLLER

SPARE PARTS

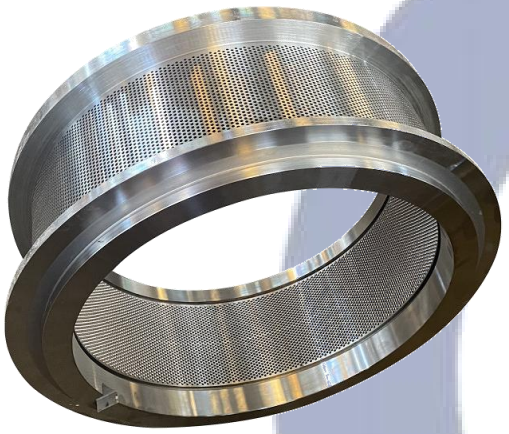

Our ring dies are suitable for:

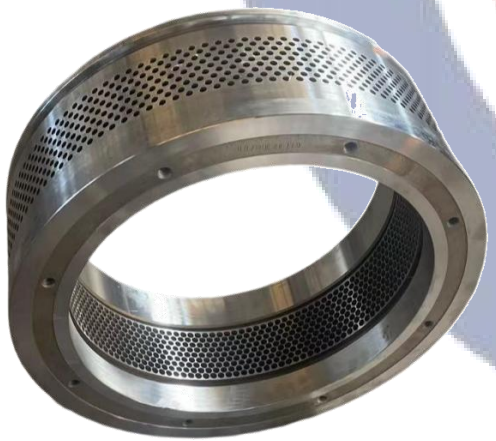

1. Biomass pellet machine: wood pellet machine, sawdust pellet machine, grass pellet machine, straw pellet machine, crop straw pellet machine, alfalfa pellet machine, etc.
2. Livestock and poultry/aquaculture feed pellet machine: pig/cattle/sheep/chicken/duck/fish/shrimp
3. Cat litter pellet miill
4. Compound fertilizer

Features:

1. Select high-quality refining and degassing blank outside the furnace
2. The mold adopts imported gun drilling and multi-station group drilling, the mold hole is formed at one time, the finish is high, the production feed appearance is beautiful, the output is high, the discharge is smooth, and the granules are well formed
3. The mold adopts the combined treatment process of the American vacuum furnace and the continuous quenching furnace, which is quenched uniformly, the surface finish is good, the hardness is high, and the service life is doubled.
