JDBIO Made

RICHESSE™

**Express Your Beauty with
a Premium Brand**

RICHESSE™

Soft · Deep · Implant ·
Ultra · Aqua Prime

Premium Dermal Filler
High-Quality, Superior Results

RICHESSE™ is designed with advanced HBCT (Hexagonal Block Crosslinking Technology), which enhances the stability and longevity of the filler. Made from premium HTL France raw materials, it ensures the highest quality and purity of hyaluronic acid. The innovative soft injection technology facilitates smooth and precise injection, while the thorough removal of BDDE significantly improves safety and minimizes potential risks, offering a reliable and effective filler experience.

- BDDE-Free Purity
- HTL France Raw Materials 
- Cannula Included

PRODUCT
DETAIL

RICHESSSE™.B	10mL x 1syr	24mg / mL	3mg / mL	Facial contouring, correction of deep skin folds, and body augmentation

RICHESSÉ™
Red Volume No. 7 · No. 9

High & Low Molecular HA Lip Filler

RICHESSÉ™ Red Volume features advanced High and Low Molecular High-Density Cross-Linking technology, ensuring precise shaping and extended durability. Infused with vitamin B12, it enhances the lips with a natural, vibrant color, free from side effects. The formulation is designed to minimize BDDE content, ensuring superior safety and performance.

RICHESSÉ™ No.7 vs. RICHESSE™ No.9 – What’s the Difference?

- Color Intensity: No.9 has a deeper, richer color
- Longevity: No.9 offers longer-lasting results
- Cross-Linking: No.9 features advanced BDDE cross-linking
- Customization: No.7 offers a softer hue; No.9 gives a more defined look

- Enhances Lip Volume & Color
- High & Low Molecular HA
- Infused with Vitamin B12

RICHESSSE™
MesoQueen Jalu Booster

Collagen-Boosting Meso Treatment for
Anti-Aging, Hydration and Radiance

RICHESSSE™ Meso Queen Jalu Booster combines premium ingredients to restore fibroblast function in the skin, stimulating collagen production for a rejuvenated appearance. Enriched with anti-aging amino acids, it activates fibroblasts and promotes collagen synthesis. NAG (N-Acetyl Glucosamine) enhances both hyaluronic acid and collagen production, while PN and HA work together to effectively improve wrinkles.

- Anti-Aging
- Whitening
- Moisturizing

PRODUCT
DETAIL

Model Name	Packaging Unit	Main Ingredients
RICHESSSE™ Meso Queen Jalu Booster	4mL x 10vials	Water(Aqua), Glycine, Proline, Sodium Bicarbonate, Sodium Hyaluronate, Lysine HCL, Acetyl Glucosamine, Glutathione, Sodium DNA

RICHESSÉ™ éyes

High-Quality Tissue Stimulator

- High-Quality PN 0.2%
- Under Eye & Face Care
- Brightening Skin
- Regenerates Skin

PRODUCT

RICHESSÉ™ TRINITY90	3ml x 10vials/ Box	PN, PDRN, High-HA, Vitamin B complex

RICHESSE™ TX 100·TX 200

Engineered for Safety,
Refined by Excellence

RICHESSE™ TX is formulated with high-quality Clostridium botulinum toxin type A, providing a premium aesthetic solution through precise action and reliable, consistent results. It selectively targets specific muscles to alleviate excessive muscle contraction, helping to preserve natural facial expressions and achieve a balanced facial contour. With refined quality control and consistent manufacturing standards, RICHESSE™ TX maximizes injector control and is designed to deliver predictable outcomes.

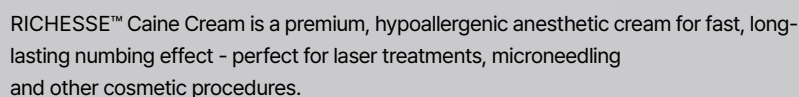

- Highly Refined Botulinum Toxin
- Rapid Onset of Action
- Sustained and Consistent Results
- Balancing Safety and Performance

PRODUCT

RICHESSE™ NAD⁺ (Nicotinamide Adenine Dinucleotide) Booster – highly effective cellular anti-aging therapy with the highest absorption rate. It supports optimal cardiovascular and metabolic function, enhances DNA repair, and promotes overall cellular health. Ideal for boosting energy, improving concentration and fighting the signs of aging at the cellular level. A great choice for those who are looking to feel alert, refreshed and revitalized.

- Fights Signs of Aging
- Promotes Overall Vitality
- Cellular Energy Production
- Boosts Metabolic Function
- Enhances Mental Clarity

PRODUCT
DETAIL

Model Name	Packaging Unit		Main Ingredient
RICHESSE™ NAD ⁺ Booster	2vials x box	NAD ⁺ 120mg x 1vial	Sodium Hyaluronate, Nicotinamide Adenine Dinucleotide
		NMN Activator 5mL x 1vial	Nicotinamide Mononucleotide, Niacinamide, Tranexamic Acid, Ascorbic Acid, Glutathione, Panthenol, Thiamine HCl, Folic Acid, Cyanocobalamin, Hydrolyzed Sodium Hyaluronate

RICHESSE™ EXO19 utilizes high-purity immune exosomes derived from advanced DLC (Dynamic Linked Cell) technology, establishing a new standard in skin regeneration. Formulated with FDA-approved ingredients, it effectively enhances skin repair, balance, and rejuvenation. The fast-absorbing liquid formula ensures optimal efficacy and rapid results. Designed for convenience, this ready-to-use solution delivers exceptional performance, providing a revitalizing experience for healthier and more radiant skin.

- Liquid Type Immune Exosomes
- 19 Active Ingredients
- Fast-Absorbing Formula

PRODUCT
DETAIL

Model Name	Packaging Unit	Main Ingredient	Treatment Area
RICHESSE™ EXO19	2.2mL x 1syr	Hyaluronic Acid, Sodium DNA (PN) Peptides, Glutathione, Total 19 ingredients	Face, scalp and areas in need of regeneration

RICHESSE™ Hi-Lo Pro with PN combines an advanced complex of high and low molecular weight hyaluronic acid (64 mg of high-purity HA) to effectively rejuvenate and remodel the skin. This powerful formulation helps restore the skin's elastin balance, enhances tissue quality, and promotes deep, continuous hydration. The result is long-lasting moisture, a radiant complexion, improved elasticity, and a visible wrinkle reduction. Perfect for skin remodeling and treating laxity, this advanced formula restores and revitalizes overall skin health.

- 64mg/mL HA Complex & PN
- Intensive Hydration & Elasticity
- Long-Lasting Rejuvenation

DEMEI™ High·Low32

Dual-HA Complex for Deep Hydration,
Wrinkle Reduction and Lasting Radiance

DEMEI™ High·Low32

HA 64mg / 32ml Hyaluronic Acid Sodium Salt
5-Point Solution
30mg High HA + 30mg Low HA

2ml / 0.066 Fl.oz.

DEMEI™ High-Low features a hybrid complex of High-Molecular (H-HA) and Low-Molecular (L-HA) Hyaluronic Acid, which stimulates collagen production, enhances skin hydration, and maintain volume. This dual-action formula targets deep wrinkles, spreads evenly across the skin and provides long-lasting results. The slow-release mechanism activates fibroblasts and keratinocytes, supporting skin remodeling and helping to achive a youthful appearance. Visible improvements can be seen after one week, with immediate hydration and revitalization from the first treatment.

- High-HA 32mg/mL & Low-HA 32mg/mL
- Radiant Glow
- Collagen Regeneration
- Sustained Effects

DEMEI™ PLA · PCL

Sophisticated polymers designed for controlled integration and natural rejuvenation

DEMEI™ PLA is a refined aesthetic solution designed to enhance natural radiance with a soft, luminous finish. Its carefully engineered formulation supports smooth application and seamless integration, resulting in a polished and elegant appearance. DEMEI™ PLA delivers luminous aesthetic rejuvenation, revealing a smooth, radiant expression of beauty.

PLA

- 77% Ultra-Refined PLA
- Improves Skin Texture & Structural Volume
- Supports Sustained Collagen Formation
- Designed for High Biocompatibility

DEMEI™ PCL is an advanced aesthetic solution designed to maintain volume and beauty over an extended period. Its stable polymer structure supports long-lasting integration, ensuring results remain refined, balanced, and consistent. DEMEI™ PCL provides durable volume enhancement while preserving a natural, elegant appearance as time passes. Through sophisticated material design, DEMEI™ PCL delivers enduring aesthetic value with confidence and reliability.

PCL

- 77% Ultra-Refined PCL
- Activates Natural Collagen Response
- Provides Durable and Consistent Performance
- Results Maintained for Up to 24 Months
- Results Last for over 2 Years

PRODUCT
DETAIL

Model Name	Packaging Unit	Main Ingredients	Purpose	Duration
DEMEI™ PLA	200mg x vial / 10vials x carton	PLA & CMC Mixture	Skin lifting and gradual volume restoration	18~24 months
DEMEI™ PCL	200mg x vial / 10vials x carton	PCL & CMC Mixture	Tissue rejuvenation and stronger lifting effects	Over 2 years

DEMEI™ Body 60 and Body 100 are premium body filler solutions engineered with high-purity raw materials to achieve uniform and stable performance. Through precise process control, the formulations ensure consistent quality and predictable results across procedures. Their smooth handling and well-balanced density support natural, refined outcomes, while reliable quality standards and sophisticated design elevate user satisfaction. These advanced solutions provide practitioners with enhanced confidence, assured control, and dependable performance in every application.

- High-grade HA 20 mg/mL
- Highly refined, premium body filler
- Precision contouring solution
- Designed for long-term structural stability

Cross-linked HA Filler
with Lidocaine

BIENFIL is a hyaluronic acid dermal filler manufactured under strict quality and safety standards. It undergoes rigorous controls to ensure extremely low levels of endotoxin, protein, and BDDE, minimizing risks and ensuring patient safety. The result is a clean, stable filler with excellent biocompatibility and reliability for both patients and practitioners. Its controlled production process provides consistent gel quality, smooth injection, and predictable clinical outcomes.

- CE Certified / ISO 13485
- Consistent and Homogeneous
- Easy Post-Treatment
- Prevention of Side Effects

Cutegel is a 3D cross-linked hyaluronic acid dermal filler that guarantees stability, safety, and natural aesthetics through its advanced manufacturing process. Formulated with non-animal based hyaluronic acid of high molecular weight (2,500,000 Da), it achieves superior purity and biocompatibility. The PP (Purification Process) technology ensures minimal BDDE residue and removes impurities, resulting in a clean, consistent, and safe product. With smooth injection properties and reliable tissue integration, Cutegel provides effective wrinkle correction and volume enhancement with long-lasting results.

- CE Certified / ISO 13485
- Minimum BDDE & 3D Linking
- Lower Adverse Reaction
- Optimal Viscoelasticity
