# ABOUT COMPANY

# ELAKACHI

At Elakachi, we utilize the technological equipment of the world's leading manufacturers, enabling us to bring your most creative and unique ideas to life. Our professional design team can create both bold and memorable or restrained and elegant designs to suit your needs. With full-color digital printing and blind embossing, your designs will truly shine. We are also prepared to develop new products that aren't yet featured in our catalog, specifically tailored to your preferences. If you need something special, we are always ready to assist!

Elakachi specializes in producing premium souvenirs made from eco-leather, felt, and their combinations. Our core assortment includes organizers for family documents, passport covers, auto document holders, and card and badge covers.

All products are custom-made with unique designs for each client. You can select from a wide range of material textures and colors. A full list of Elakachi products is available in our catalog, and we offer retail sales through leading platforms.

**ELAKACHI** products acquire a full-blown status of an image product in combination with modern technologies of personalization and protection.

## DIGITAL PRINTING

Currently digital printing is one of the fastest and high-quality ways to materialize bright design ideas. Our state-of-the-art equipment allows to apply a full-color image of photographic quality to a white leather, the varnish top coating protects against mechanical damage and significantly improves the appearance of the product.

## EMBOSSING

Blind embossing is applied to the colored leather product without printing. You are able to choose 11 colors with the possibility of any combination. Along with the quality of the material, a flawlessly made overprint will emphasize the premiumness of the product as a daily used item, as well as advertising media.

## RFID BLOCKING

The method of blocking the reading of an RFID tag is based on the principle of shielding, when a material is placed between the reading and receiving device, which prevents the passage of the radio signal in both directions.

In our manufacture we use special metal plates, which are tightly sealed between the layers of the product and maximally protect the cards placed inside from being read in any way and from any side.

The range of materials is constantly expanding. The main advantage of this variety is the ability to combine textures and shades within the product design with virtually no restrictions creating unique compositions.

## LEATHER "SAFFIANO"

Saffiano is a textured eco-leather. It is thanks to its texture with a diagonal shallow embossing that the material gains high strength and resistance to abrasion.

## LEATHER "CLASSIC"

Manufacturing technology repeats the pattern and texture of genuine leather.

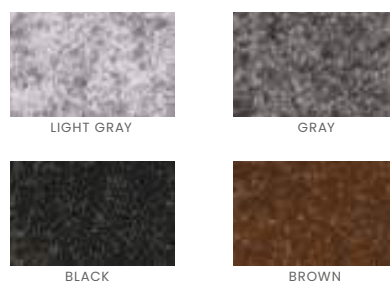

## LEATHER "ITALY"

Series of high-quality leather with a metallic effect.

## FELT

Felt is a homogeneous, dense mass of felted fibers, mechanical origin.

## LEATHER "SOFT TOUCH"

The peculiarity of this material lies in the creation of a special, pleasant to the touch surface, similar to velvet.

## LEATHER "TEX"

Series of high-quality eco leather with various texture patterns.
