Company culture

Company vision: To become one of the best suppliers in the antenna industry.

Company culture: This company has no culture, they only talk about money.

Company mission: Prove strength with actions, and defend dignity with performance.

The image features a central orange circle containing the text '02 Products Introduction'. This central element is surrounded by several decorative orange elements: a large semi-transparent circle in the top-left, a smaller solid circle in the top-right, another solid circle in the bottom-left, and a small hollow circle in the bottom-right. Additionally, there are several orange arcs of varying thicknesses and radii scattered around the central circle, some overlapping it. The overall design is clean and modern, using a monochromatic orange color scheme on a white background.

Application Areas

▷ The suction cup antenna has a better and more efficient standing wave ratio, and the line length can be customized; under the same frequency band and structural size as the rubber stick antenna, the gain is higher and the transmission distance is longer. Different installation locations can be selected according to actual use requirements.

▷ The suction cup antenna also has a wide range of applications. In addition to the vending machines, express cabinets, and vehicle-mounted radios that we often see, it can also be applied to wireless gateways and wireless modules with medium gain requirements.

▷ The rubber stick antenna is the most common external antenna with moderate gain and relatively favorable price. It is commonly used in wireless communication modules, wireless routers, data transmission radios, cameras, etc.
