### Before & After

WAKE PRO 80 H+L is a Hyaluronic Acid (HA) skin booster that is intended for skin remodelling.

Unlike wrinkle reducing and dermal filler treatments, WAKE PRO 80 stimulates collagen and elastin, attracting water in the deeper layers of the skin.

WAKE PRO 80 is not a dermal filler, it's a skin booster that promotes two distinct effects in the treatment area; a bio regenerating action which stimulates the body's own Hyaluronic acid production and elastin; and a tightening effect, counteracting skin laxity and remodelling the face, hands, neck and chest.
