

CULTIVEXTM

GLOBAL TRADE

We are a bridge between farmers and international markets

About us

We empower businesses at every stage, optimizing farming practices and boosting the value of exportable commodities while preparing them for new global opportunities.

We believe in connecting farmers with those who need their products worldwide.

What do we do?

01

Advice on agricultural production and export standards

02

Business management for agro-foods

03

Integral management for Imports and Exports

Advice on agricultural production and export standards

We help you optimise productive processes, enabling you to comply with the quality standards and regulations that international markets require.

A

Analysis of requirements and regulations

- Evaluation of quality demands in target markets
- Identification of key approvals (compulsory and voluntary) to optimise competitiveness.
- Revision of local and international applicable regulations.

B

Improvement of productive processes

- Diagnosis of current crop practices and improvement opportunities.
- Implementation of innovative and sustainable techniques to increase productivity.

Business management for agro-foods

We promote the internationalisation of your company with effective commercial strategies and innovative technology

A Strategic planning for export

- Setting goals, objectives and internationalisation strategies adapted to your business.
- Analysis of the export capacity, strength and improvement opportunities.

B Market selection and strategic alliances

- Recognition and detail analysis of markets with high potential.
- Search for commercial partners and set up partnership models.
- Implementation of Artificial Intelligence (AI) tools to optimise decision-making.

C International commerce strategies

- Development of strategies to access global markets.
- Setting of export prices and export offers.

D**Certification schemes**

- Consulting on certifications such as Agricultural production and Good Agricultural Practices (BPA).
- Creation of procedure manuals adapted to specific regulations.
- Support during external audits to guarantee compliance.

E**Technical training for producers and teams**

- Practical workshops on BPA and Integrated Pest Management.
- Training in sustainable management of soil and responsible use of agricultural chemicals.

Integral management for Imports and Exports

We promote the internationalisation of your company with effective commercial strategies and innovative technology.

A Registration and permits

- Registration as an importer/exporter at the corresponding entities.
- Record keeping and required certifications to export.

B Planning and efficient logistics

- Selection of the most adequate logistics according to costs, time and product type.
- Coordinate shipments and optimise the distribution chain.

C Setting costs and operations

- Detailed analysis of the expenses for a rentable export.
- Consulting on each stage of the process to guarantee an efficient operation.

Contact us and take your business to the next level in international commerce.

Before implementing any of the services mentioned above, we conduct a diagnostic analysis, which will take place **within 30 calendar days of the accepted quote.** In each case, we will visit the company's facilities and meet with managers and required staff
