# MEMBRANE SWITCH FORCE SENSING RESISTOR SENSOR, TOUCH PANEL PRODUCT AND SOLUTION PROVIDERS

## 企业介绍

- Dongguan Soushine Industrial Co., Ltd. was established in 2008 and we are a technology company that integrates design, research and development, production, and sales.
- We have two independent production and manufacturing bases, covering areas of more than 4000 square metres.
- After nearly 20 years of development, we have strong research and development technology and production capabilities. Our main products include membrane switches, touch switches, Force sensing resistor sensor, graphic covers, panels, etc. These products are widely used in high-tech fields such as communication, industrial control and military, medical equipment, automobiles, instruments, smart homes and toys, automatic control systems, etc. Our partners include well-known enterprises such as Panasonic, Haier, TE, Huawei, etc.
- The company currently has over 100 employees, more than 300 equipment, and 10 production lines.
- And has passed ISO9001:2015, RoHS UL, CE, and ZHB environmental system certifications, making it a national high-tech enterprise.

## Enterprise culture

### Mission

Innovation To Rely on,  
Focus on the physical and mental happiness  
of customers and employees.

### Vision

Becoming a high-yield, happy century old enterprise

### Value

Customer first, honesty and integrity; Unity and  
cooperation, hard work and responsibility

## Development history

- Panasonic air conditioning panel officially put into production
- Australian Star Audiovisual Large Scale Electronic Whiteboard Formally Launched
- Thin film capacitive touch switch officially put into production
- Thin film switch with LED display light put into production
- Waterproof membrane switch put into operation

Establish a foreign trade team  
The Sensor Business Unit was established

Join Shenghe Academy  
Lead the management team into the success equation

2008

2023

· Acrylic panel production  
· Become a Huawei second tier supplier

- The company has passed the ISO9001 international quality system certification
- Certified by Dongguan Environmental Impact Assessment
- Dongju Zhishen Group's thin film line begins production

- Become a first tier supplier of Haier
- Management Learning Changsong Organizational System
- Submit the application for municipal high-tech enterprises

High-Tech Enterprise Certification

## Qualification certificate

After nearly 20 years of development, we have strong R&D technology and production capabilities.

### Workshop display

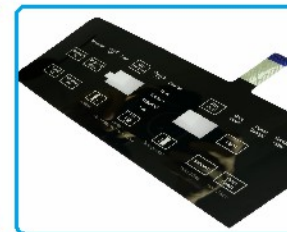

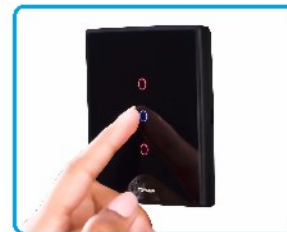

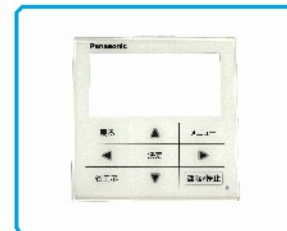

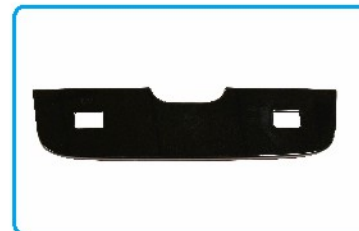

The company currently has over 100 employees, more than 300 equipment, and 10 production lines.

# CORE PRODUCTS

- Seat pressure sensor
- Thin film pressure sensor
- Membrane switch
- Touch Panel
- Matrix force sensing resistor sensor
- Sensor+PCBA
- Membrane switch graphic overlay
- Thick panel

## Membrane switch

### Environment Protection

- Clear printing
- Long lifespan
- Beautiful and generous appearance
- High resolution
- Good service
- Intelligent touch
- Environmental protection

## Membrane switch series

Color film switch

1. Rich colors
2. Beautiful and elegant colored graphic overlay

Thin film switch

1. Good performance and long lifespan
2. Precision craftsmanship

Transparent film switch

1. Precision craftsmanship
2. Waterproof and long lifespan

FPC membrane switch

1. Bending resistance, high current
2. Waterproof and dustproof
3. Long lifespan

Drip film switch

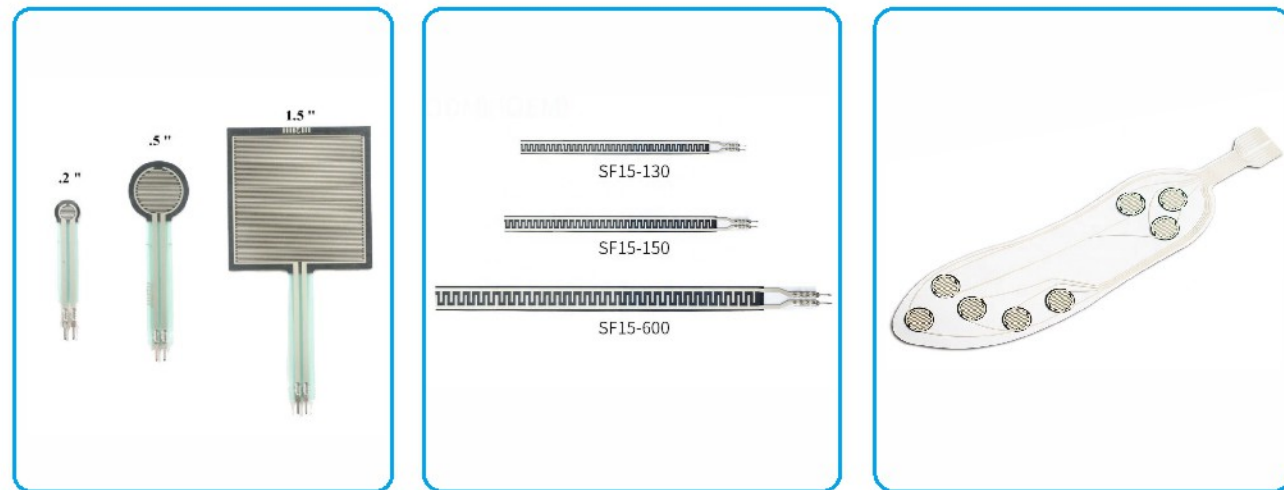

1. Three dimensional beauty
2. Dust prevention
3. Long lifespan

Silicone membrane switch

1. Durable
2. Strong temperature moderation
3. Long lifespan

## Force Sensing Resistor Sensor

All single point sensors have the characteristics of sensitivity, short response time, and long lifespan, And we have developed a minimum force of 2g to trigger a maximum force limit of 100kg. (Customised 0.2N~200N)

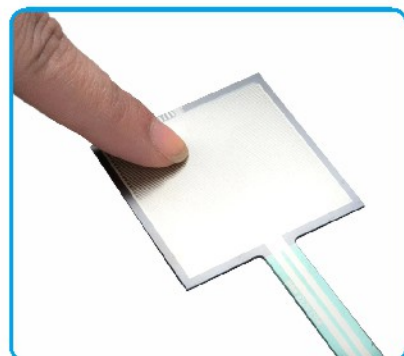

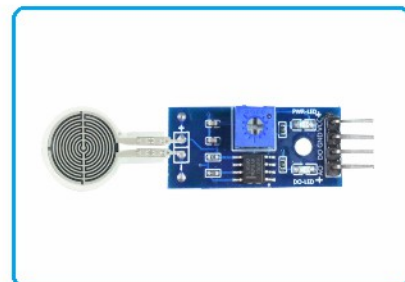

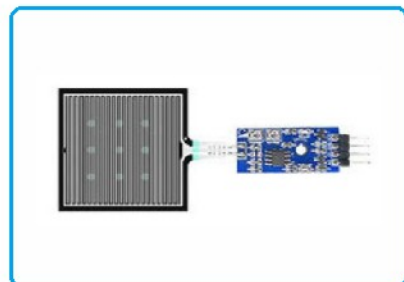

## Matrix film pressure sensor

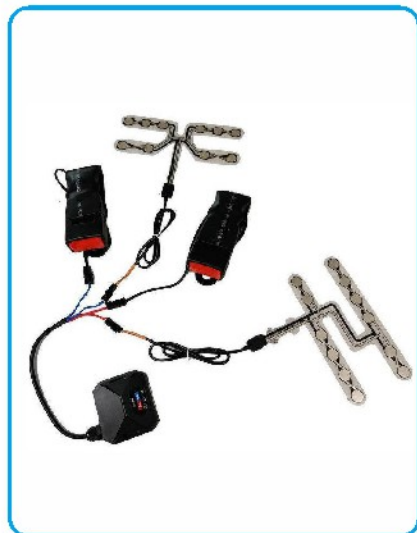

## Seat pressure sensor

## Sensor+ PCBA solution, including single point sensor+ PCBA Matrix point sensor+PCBA

## Seat sensor+solution
