PART ONE

Company Profile

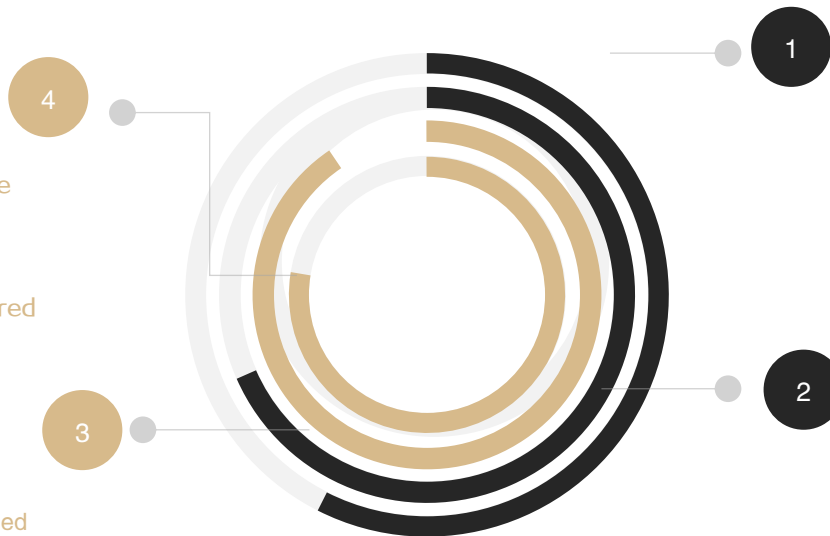

Service purpose

Over the past years, we have been adhering to "focus on quality, base on reputation", and constantly strengthen the internal comprehensive competitiveness, Now we have become one successful cosmetic brush supplier for many world-renowned brands. Our friends have covered the whole world. Benefit each other is our targeted purpose,

Brand and certification

Our self-operated brand "MIRANDA" was officially launched in 2014. In 2018, we passed the certification of ISO9001 and ISO14001 successfully.

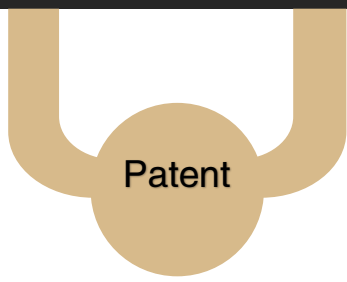

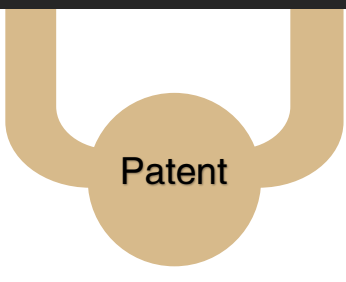

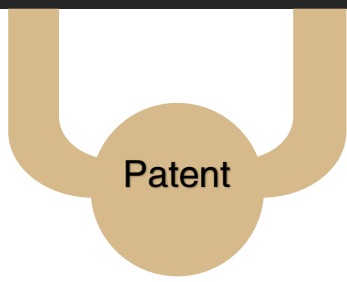

1 transportation conditions

Cangzhou Kangmei was established in 2008, located in Machang Town Industrial Park, Qing County. It is a enterprise integrating the production, RD and sales of cosmetic brushes. Our company covers 2,000 square meters with more than 200 employees, 160 km away from the Beijing airport and 110 km away from Tianjin Port.

2 First-class team

We have a team of brush making technical staff with more than ten years and an efficient management team, which truly achieves a one-stop process from raw material supplying to cosmetic brush production.

Professional customization

We can design for you base different style, color and foundation.

1

Hair

High-quality goat hair, Strong powder catching ability and releasing power.

2

Ferrule

Golden copper ferrule, more wear-resistant than aluminum ferrule.

3

Handle

The wooden handle with pointed shape and color make the makeup brush look better, this is Chinese style beauty.

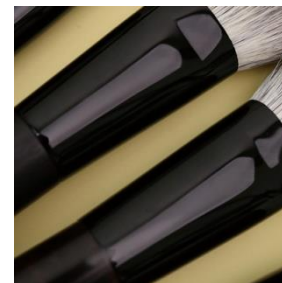

1 High quality silver fox hair

Strong powder catching ability , very precious makeup brush material, soft and fluffy with texture.

2 Aluminum ferrule

Thickened aluminum ferrule has higher hardness, luster is very textured, anti-corrosion and anti-rust, can better connect the brush handle, durable.

3 Ebony solid wooden handle

Because of its special forming environment, there will be no cracking phenomenon.

Ebony has both the quaintness of wood and the charm of stone.

PART THREE

Craftsmanship

1

材料质检/Inspection of raw material

所有的刷管，刷柄，我们都要进行再次的来料质检，严格把控产品质量。

Before producing the cosmetic brush, we will check the ferrule and handle again to ensure that the raw materials are 100% qualified.

2

原毛改制/Dressing hair

利用辅助工具将整把的毛拆开，将其中的倒毛和折毛一根根的清除掉。

Take the hair apart to remove the unqualified hair.

3

墩毛/ Put hair into mould

将秤好的毛放入墩罐中，墩扶墩扶墩墩扶，每一次的墩和扶都会让毛头的形状更加完善，趋于完美。

Put the weighed wool into the mould, and the workers use skillful manipulation techniques to make the shape of the hair head constantly perfect and tend to be perfect.

Repair hair shape /修型

用手工刀将毛头多余的长毛切除干净，保证刷子完美的外形。

Workers remove excess hair from the brush head to ensure a perfect brush head shape.

4

Product assembly /组装

将注胶固定的毛头与刷管和刷柄连接一起，将柄的字体对准口管正面进行对接。

Assemble the finished hair head and the handle together to ensure the correct orientation of the handle.

5

Product inspection /成品质检

将成品刷从毛头到口管到木柄和印刷全面检验合格。

Comprehensively inspect the hair, ferrule, and handle of the finished makeup brush to ensure that the product is qualified.
