AIRSOFT GAS

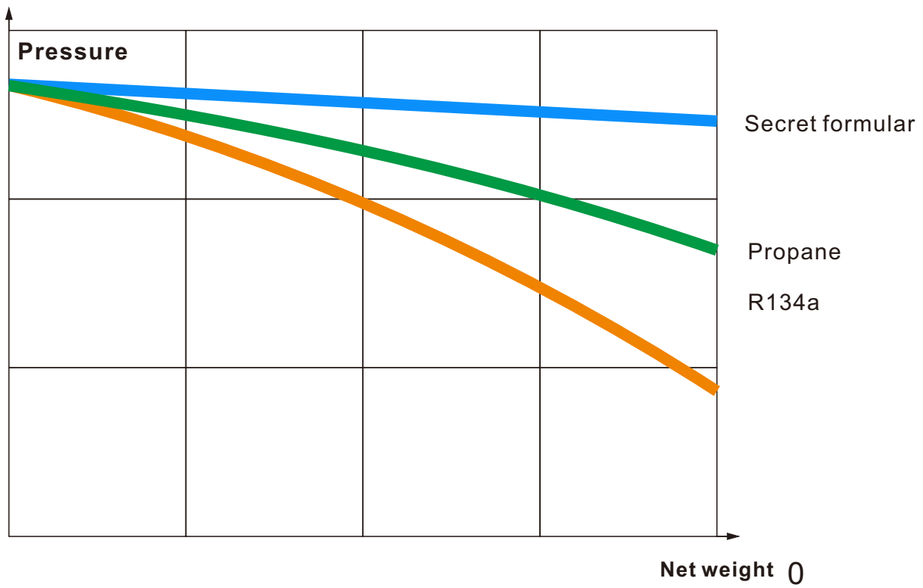

1.Shooting Temperature Range

2.Gas Pressure

3.Pressure Stability

150PSI

BLUE GAS

Great allround gas for spring, summer and autumn use,
Suitable for a wide range of airsoft pistols and rifles.
Not suitable for cold winter temperatures, Japanese made pistols and rifles. Features a very stable gas pressure, exceptional trajectory control, low temperature efficiency and increases the performance of your gun significantly.

Pressure at 20°C: 1.0 Mpa / 150 Psi / 1.0 Bar
Capacity: 1000ml
Fill quantity: 300g

US DOT

170PSI

GREEN GAS

Great allround gas for spring, summer and autumn use,
Suitable for a wide range of airsoft pistols and rifles.
Not suitable for cold winter temperatures, Japanese made pistols and rifles. Features a very stable gas pressure, exceptional trajectory control, low temperature efficiency and increases the performance of your gun significantly.

Pressure at 20°C: 1.2 Mpa / 170 Psi / 1.2 Bar
Capacity: 1000ml
Fill quantity: 300g

US DOT

200PSI

RED GAS

Powerful performance gas for year-round use including winter time. Suitable for a wide range of airsoft pistols and rifles. Not suitable for very cold winter temperatures, Japanese made pistols and rifles. Features a very stable gas pressure, exceptional trajectory control, low temperature efficiency and increases the performance of your gun significantly.

Pressure at 20°C: 1.4 Mpa / 200 Psi / 1.4 Bar
Capacity: 1000ml
Fill quantity: 300g

US DOT

260PSI

BLACK GAS

Extremely powerful performance gas. Suitable for winter use and with high end metal pistols and rifles. Improper usage may result in damage to pistols, rifles, grenades and magazines. Features a very stable gas pressure, exceptional trajectory control, low temperature efficiency and increases the performance of your gun significantly.

Pressure at 20°C: 1.8 Mpa / 260 Psi / 1.8 Bar
Capacity: 1000ml
Fill quantity: 300g
