The Soul of Craftsmanship

At the heart of Moonjar lies a deep **commitment to craftsmanship**.

Our artisans, with skilled hands and a passion for perfection,
transform raw lava stone into exquisite tiles.

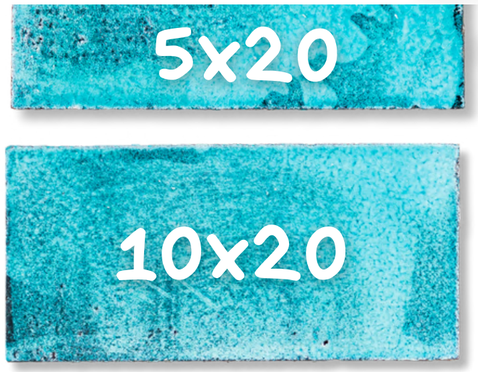

Basic Tile Dimensions

5x20 10x10 10x20 10x40 20x20 20x40 cm

At Moonjar, we work with a core selection of signature tile sizes — **but we're always open to crafting custom dimensions** to fit the unique character of your project.

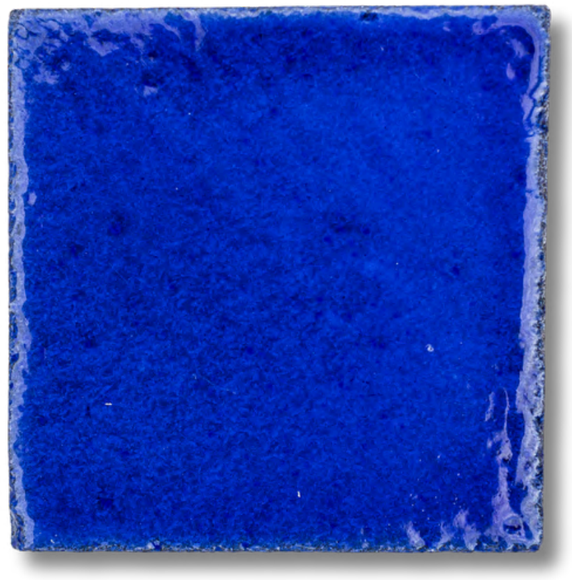

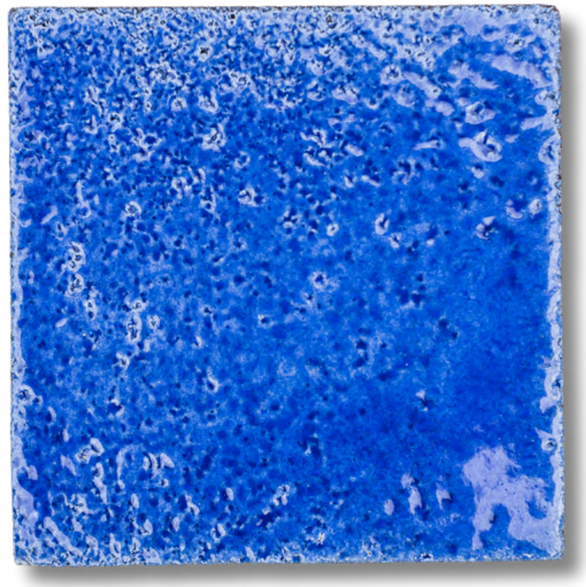

The largest custom size we can make now is
80x110 cm

Types of finishes

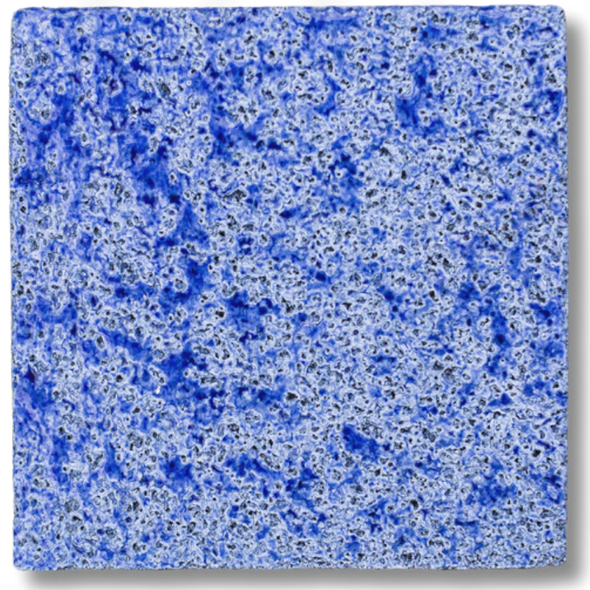

Natural lava stone has a unique natural character to its finishes,
making each project unique.
We offer mixed finishes in every collection, or you can choose yours.

Minimal character

Middle character

Full character

Sunlight or directional light alters shadows, tones, and atmosphere.

Application variations

One Color — Three Expressions.

Each Moonjar base color comes to life in three distinct application styles. Spray, brush, or a layered blend — the same glaze reveals different depth, texture, and tone. What looks like one color becomes a spectrum of possibilities.

For example, **"Lava Core"** — it's three distinct moods from a single glaze.

Choose the option that is perfect for your project!

Basic color palette

Choose from our base color palette
or make your perfect color with our
Color Matching Service.

The catalog with basic colors is *here!*

Color Matching Service

How It Works:

1. **Consultation:** Share your color vision and preferences with our experts.
2. **Palette Creation:** We develop four variations of color.
3. **Selection:** Choose your ideal shade from the custom palette.
4. **Production:** We craft your custom tiles using the selected color.

Pricing:

- The service is priced at Rp 900.000 per color.
- Enjoy this service **for free on orders over 20 m²**.

Discover Moonjar Collections:

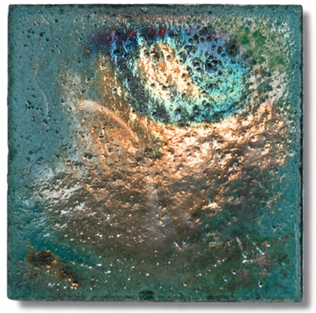

Authentic Collection

Classic lava stone tiles in single-tone finishes with soft texture.

Raku Collection

Deep, fire-born surfaces with copper-infused tones, rich like fading embers or smoky gold.

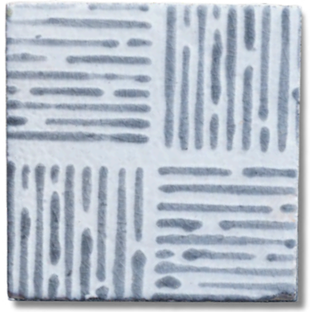

Creative Collection

Handcrafted tiles with artistic glazing, brushwork, and expressive mixed techniques.

Gold Collection

Precious tile with real gold accents is an architectural treasure for sophisticated interiors.

Stencil Collection

Raised surface patterns and bold textures with ethnic charm.

Silkscreen Collection

Fine, drawn-like motifs inspired by traditional craft and textile detailing.

Stencil collection & Silkscreen collection samples

Bold or delicate, our patterned tiles bring texture and character to any space.

Stencil collection creates raised, textured patterns that can be felt to the touch, adding physical depth and presence.

Silkscreen collection offers finely drawn, refined ornaments reminiscent of painted fabrics and illustrations, adding elegance and visual poetry.

Custom Stencil & Silkscreen Design Service

Tailored Designs: Bring us your ideas and we will develop your customized templates and production matrices, for your most creative ideas.

Unlimited Creativity: From simple motifs to complex fantasies, we create designs that are uniquely yours.

The service is priced at Rp 2.000.000

Raku collection

10x40cm	Rp 3.600.000
5x20cm	Rp 3.780.000
20x20cm	Rp 4.780.000
20x40cm	Rp 4.780.000

Raku collection

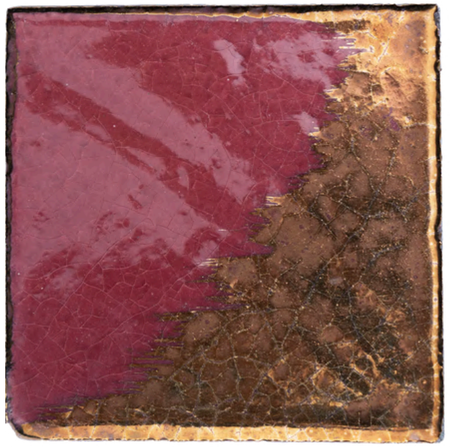

(Jap.焼楽raku-yaki) is a type of Japanese pottery that dates back to the 16th century. **The term raku is literally "pleasure" or "simplicity, authenticity".**

The Raku collection is our very special love and pride at Moonjar. It represents a fusion of history, art and contemporary design.

Each Raku tile reflects our love for craftsmanship and creating meaningful, beautiful designs.

Gold collection

Gold Collection is all about luxury without excess. With **real gold** layered onto lava stone, these tiles bring a restrained opulence — timeless, rare, unforgettable.

Gold can be applied as full coverage, as a pattern, or partially — each piece is individually crafted and finished.

The price depends on the percentage of gold coverage. Individual tiles can also be ordered.

Exclusive collection

Beyond the tile. This collection is where Moonjar’s craftsmanship meets bold design visions — from lava stone countertops and washbasins to sculptural coffee tables, complex-shaped tiles, and bespoke decorative objects.

It’s a space for architects and designers to explore one-of-a-kind ideas and bring them to life through form, texture, and fire.

All you need to know about Moonjar tiles:

1. Unique Texture and Color: Each tile has its own character — thanks to the natural texture of lava stone and the artisanal color application. Even within the same shade, tiles may vary.

2. Installation: Due to slight variations in tile dimensions, we recommend a dry layout before installation. This helps to arrange the tiles for the most harmonious look.

3. Safety: Glazed surfaces can be slippery. For wet areas like bathrooms and showers, use smaller tiles with an anti-slip treatment.

4. Thermal Properties: Tiles can heat up in the sun. This is a natural feature of lava stone — keep it in mind when designing open space.

5. Moisture & Waterproofing: Lava stone is moisture resistant and ideal for bathrooms. However, waterproof sealing materials must be used during installation to protect the underlying structures.
