Our Product

We supply high-quality sheep wool, livestock, and agricultural outputs produced under sustainable farming practices. Our wool and livestock products are prepared to meet international market standards and are suitable for textile manufacturing, breeding, and large-scale agricultural use. We focus on consistency, traceability, and long-term supply reliability for global buyers.

Statistic

Ntilane Solutions Group operates over 5 hectares of agricultural land and manages a growing livestock portfolio of more than 700 sheep and over 500 cattle, alongside additional livestock. Our operations support both local and international supply chains, with active exports to markets including United States of America, China and Australia. These figures reflect our capacity for scalable production, consistent supply, and long-term growth across the agricultural value chain.
