ORTURA

ARGENTINE ORIGIN MERCHANT

We source it. *We prove it.* We move it.

Argentine chia seed, analysed lot by lot before it is offered.
One accountable counterparty from the plant to the vessel.

PRODUCT	GRADE	CROP	INCOTERM
Chia seed	Conventional	2026	FOB Buenos Aires

ORTURAORGANICS.COM

ARGENTINE ORIGIN MERCHANT

New as a brand. *Not new to the port.*

Ortura is an Argentine origin merchant for chia and sesame, built on a founder-owned Buenos Aires foreign-trade house with over twenty years in Argentine import, export and customs. Own fleet, own warehousing in Buenos Aires and Zona Franca La Plata, and customs representation at Buenos Aires, Ezeiza, Campana and La Plata.

20+ yrs	1 house	Per lot
Argentine import, export and customs behind every lot	Sourcing, analysis and export under one roof	Analysed before it is offered, reported to your spec

What we actually do

01	We source it	From established growers in Northwest Argentina and Buenos Aires, held to one standard. We take title ourselves, so the product is contracted, not a brokered promise.
02	*We prove it*	Every lot is analysed before it is offered, including the polar pesticides a standard multiresidue screen cannot see. You get the figures, not a blanket pass.
03	We move it	Logistics and customs are handled in-house. The same desk answers for the lot, the analysis and the documents you pay against.

Two seeds. *Analysed, not assumed.*

PRODUCT 01 Chia seed *Salvia hispanica L.*

Shelf life	2 years
Availability	Forward enquiries welcome · shipment from Q2 2027

Figures are indicative and confirmed against your specification. Every seed we add clears the same analytical bar before it is offered.

We run the polars.
Then we tell you the number.

A standard multiresidue screen cannot see the polar pesticides, and those are the ones that fail a lot at the port. We run them on every lot and report the figure before you commit.

MULTIRESIDUE AND POLARS

LC-MS/MS · QuPPe polar method. Glyphosate, AMPA, paraquat, diquat, phosphonic acid.

METALS · MICRO · PHYSICAL

Heavy metals, microbiology, purity and moisture at accredited EU laboratories.

TURNAROUND

3–5 days. The result reaches you before the lot is committed.

REPORTED

Per lot, against your spec: EU MRLs, a private list or a purity floor.
