Steel & Aluminum Product Guide

Coils for roofing, cladding and industrial fabrication

Qingdao Zhongchuang Zhihong Steel supplies steel and aluminum products. Share your application and specifications so we can discuss suitable material options and an export quotation.

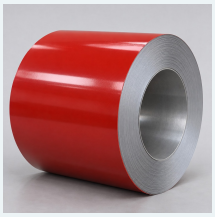

Galvanized steel coil (GI)

Zinc-coated steel for profiled roofing, cladding and fabrication. Specify the steel grade, zinc coating and surface treatment.

Galvalume steel coil (GL)

Aluminum-zinc coated steel for roofing, wall panels and formed components. Specify the AZ coating designation and base steel grade.

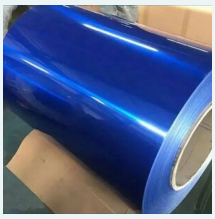

Prepainted galvanized coil (PPGI)

Paint-coated galvanized steel for roofing and cladding. Confirm the zinc coating, paint system, color, gloss and film thickness.

Prepainted galvalume coil (PPGL)

Paint-coated aluminum-zinc steel for roofing and wall cladding. Confirm the metallic coating and paint layers together.

Color coated aluminum coil

Prepainted aluminum for roofing, decorative cladding and formed components. Specify the alloy, temper, coating system and finish.

Product images are illustrative. Final material specifications, packing, order quantity, price and lead time are confirmed with each quotation.

Coated-Steel Supply Resources

The partner mill catalogue describes a producer established in 2007, with two galvanized lines, one aluminum-zinc coating line and two color coating lines. Its stated monthly production capacity is 18,000 tonnes. These figures describe the partner mill supply resource.

Catalogue Specification References

Galvanized steel (GI)

0.12-6.0 mm thickness; 610-1500 mm width. Zinc coating reference 40-275 g/m2. Coil ID 508 / 610 mm.

Galvalume steel (GL)

0.12-1.5 mm thickness; 610-1500 mm width. AZ40-AZ150 coating reference. Coil ID 508 / 610 mm.

Prepainted steel (PPGI / PPGL)

0.12-1.5 mm thickness; 610-1500 mm width. RAL or wood finish references. PE, PVDF, SMP and HDP coating systems for enquiry.

Roofing and profiles

Corrugated, trapezoidal and tile roofing profiles. Stone coated roofing products, ridge caps, galvanized strip and C / Z purlins for enquiry.

Each size, grade, coating and finish combination is subject to availability and quotation. Request order-relevant mill and inspection documentation when discussing your requirements.

Supplier resources and specifications are based on the partner catalogue provided for this guide. Contact Qingdao Zhongchuang Zhihong Steel for material selection and order coordination.

Prepare Your Enquiry

Send the following details to help us prepare a relevant quotation.

Material	GI, GL, PPGI, PPGL or color coated aluminum
Grade / alloy	Steel grade or aluminum alloy and temper, plus the required standard
Dimensions	Thickness, width, tolerance and cut length where applicable
Coating	Zinc or AZ coating mass, paint system and film thickness
Appearance	Color reference, gloss, surface finish and approved sample needs
Order quantity	Required tonnage, coil weight and inner diameter
Destination	Destination port, delivery terms and target shipment date
Documentation	Required inspection scope and order-specific documents

Material Selection & Order Confirmation

Confirm the substrate, coating and forming requirements together. For painted materials, use a physical sample to agree color and gloss. Confirm available sizes, inspection documents, packing method and loading requirements before placing an order.

Prices, minimum order quantities and lead times are confirmed by enquiry. Inspection arrangements and documentation are agreed for the individual order.
