VISION

To be the one of best and reliable plastic industry which provides variety of quality reprocessed plastic with competitive price and professionally managed.

MISSION

1. Committed to use competent human resources and have a good management skill
2. Always use modern and up to date machinery
3. Committed to always improve quality which is supported by updated laboratory
4. Support every effort to participate in preserving the environment and the earth

OUR MILESTONE

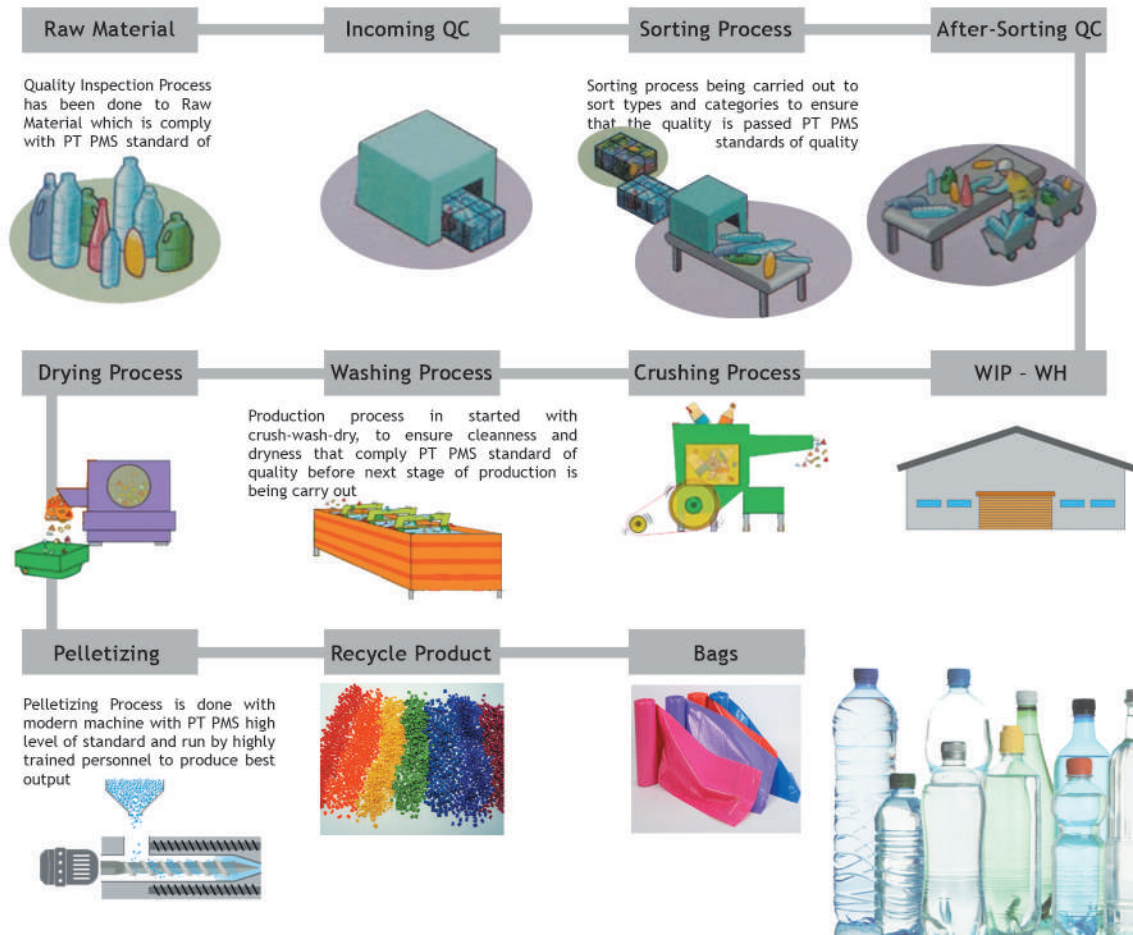

In February 2019, we have been in collaboration with ExxonMobil in producing a strong and reliable recycle resin with a good clarity for our customers under brand Sapphire HB 88 A.

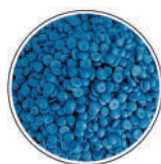

At early 2017, we also give training for sorting plastic waste to local government facility before the waste go to landfill. Assist to set up skills, tools and trolleys to collect plastic waste.

In November 2016, proudly PT Pelita Mekar Semesta is the first plastic recycle factory that have been appointed by UNILEVER to do collaboration in process and supply flexible plastic flakes for UNILEVER Solvolysis Project.

OUR PROCESS

OUR PRODUCT

We can provide variety type of reprocessed plastic pellets and plastic bags.

For reprocessed plastic pellets covering HDPE Film, HDPE Blown, LDPE Film, LLDPE Film, EVA, PP Film, PP Yarn, and many more.

For reprocessed plastic bags covering garbage bags, agriculturan bags, environment friendly t-shirt bag, and many more.

Our plastic bags can be 100% from recycle and yet we can get good and strong quality.

TECHNICAL SIDE

OUR RECYCLING PRINCIPAL STANDARD

Manually handpicked and sorted each plastic and separate them to get purity and maximum quality for each type of plastic. Crushed, washed, dried & recycled. This process can filter all the impurities.

GRADE

We grade all of our raw material before we grinded it into flakes. This will maintain and ensure that each grade has the highest quality that will satisfy our clients.

PRODUCT SAFETY FEATURES

All of our products ranges of PE, PP and other is non toxic, 100% recyclable again easy to process.

APPLICATIONS

Our material can be used for making varies end products like toys, shopping bags, t-shirt bags, garbage bags, pipe, bottles, nets, office chairs and many more items.

COMPETITIVE ADVANTAGE OF BUYING OUR PRODUCTS :

Benefits :

- Cut down production cost to end user so they can provide more competitive price
- Get better quality of your product from our best, clean and purge material
- Participate in reducing waste collection and save energy resources
- Use more of recycle on our plastic bags

OUR COMMITMENT

Our commitment to customer is to give best and stable quality that can be received from recycle process.

Raw material is handpicked and sorted in a very detail and careful process by highly experienced employees.

Our commitment to environment is to give protection and dedication to the highest level.

Process is done with responsibility and sustainability that can achieved continuously.

In Recycling we are committed to "Environments Green and Clean", mission to both customer and environment.

Proudly our quality management system has been granted ISO 9001 : 2008 and ISO 9001 : 2015 certification.
