SNOW WHITE DRIP
HOW TO USE

1 Mix Lipo-1 (1 ampoule) and Asco-1 (1 vial) into a bag of 250ml NSS (Normal Saline Solution).

2 Administer using IV or IM with slow drip for at least 40 minutes.

3 Add Gluta-1 1200mg (1 vial) separately with Y-injection at the last 15 minutes of the drip session.

※Double drip : One drip session can use up to 2 vials of Gluta-1 1200mg

Caution

In case of discomfort, half of Asco-1 vial may be used.
※Discard remaining half and do not reuse remaining content.

Keep extra hydrated before and after the treatment.
