

COMPANY PROFILE

"Trade Solutions"

About Us

Andalan Globalindo is a global commodity trading firm. We access, develop, service and sustain international commodity markets on behalf of producers and end-users. We focus energy and resources on activities that make trade work better. We invest in high-quality infrastructure and build innovative, end-to-end services that bridge the gap between buyers and sellers more effectively. Our activities help to create more efficient markets, reducing long-term costs for participants.

Our Story

Andalan Globalindo was founded in 2008 in Indonesia with a focus on commodities trading across the continent. We are growing our footprint and client base across the globe.

What we do

Physical trading and logistics in commodities markets is our core business. We have made strategic investments to develop assets that strengthen our trading operations. These are managed independently as standalone organisations. They transact business within the Group and with third parties. This approach maximizes productivity in all parts of the Group and ensures resources are allocated efficiently.

Our key sectors are Metals and minerals, Energy, Agriculture and Technology

Energy

We are getting our footprint in trading oil and petroleum products. We buy, sell and move barrels more efficiently and invest in world-class assets that benefit end-users. We retain our edge by continually improving logistics, service and performance. We strategically handle large volumes of coal for off take to our end users.

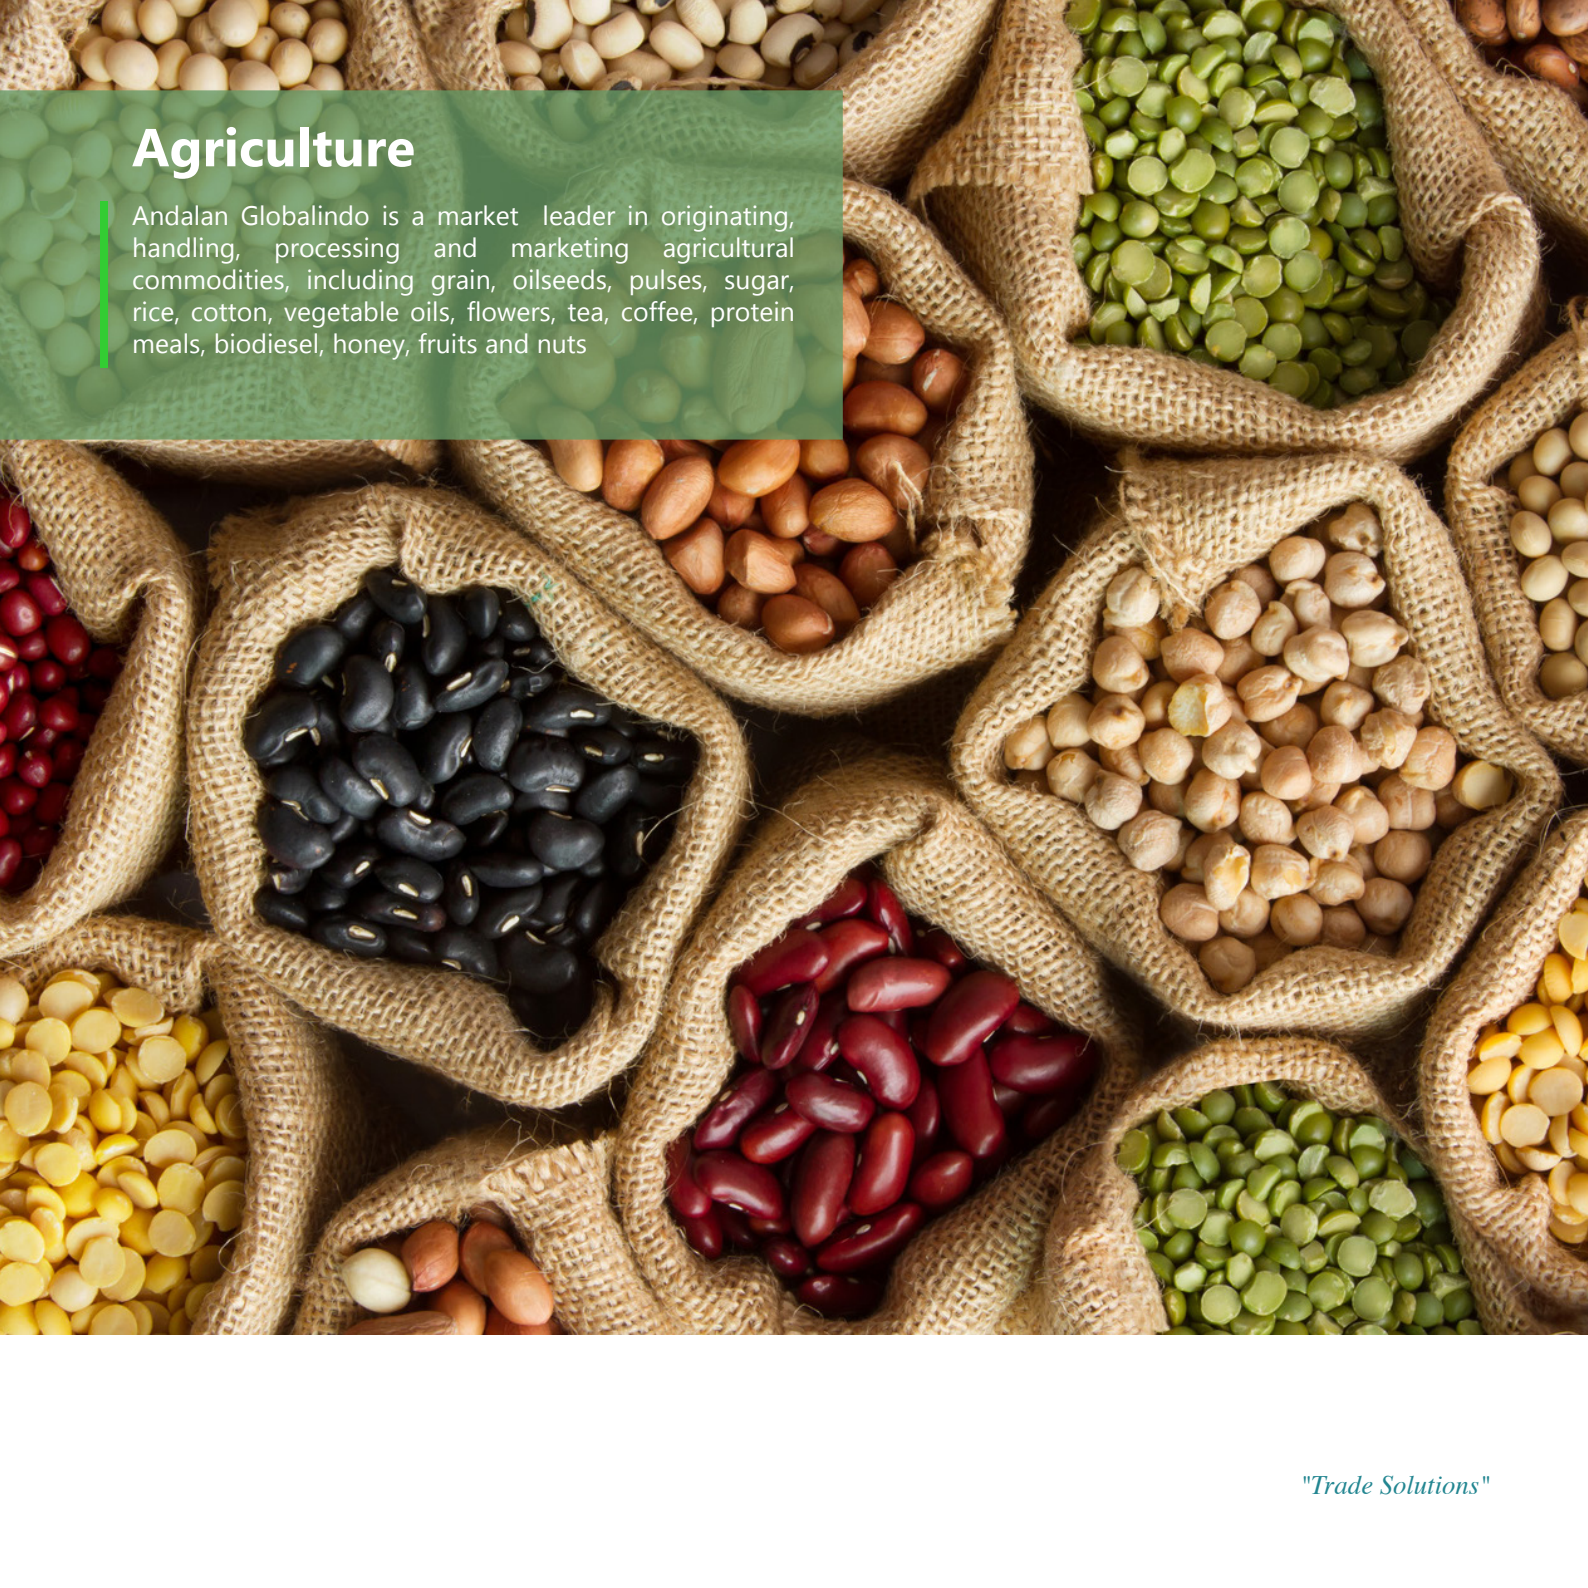

"Trade Solutions"

Metals & Minerals

We trade in metals and minerals. We are always on the lookout for better ways to connect producers with end-users. We streamline and simplify supply chains. We participate in off-take agreements and develop downstream outlets. We form strategic alliances and invest in infrastructure.

This business includes commodities such as chrome, copper, zinc & lead, nickel, ferroalloys, alumina & aluminum, iron ore and gold.

The background of the slide is a high-quality photograph showing a variety of agricultural products. Numerous burlap sacks are filled with different types of pulses and grains. Visible items include black beans, red kidney beans, green lentils, yellow lentils, and various types of beans and grains in shades of brown, tan, and white. The sacks are arranged in a dense, overlapping pattern, creating a rich texture and showcasing the diversity of agricultural commodities.

Agriculture

Andalan Globalindo is a market leader in originating, handling, processing and marketing agricultural commodities, including grain, oilseeds, pulses, sugar, rice, cotton, vegetable oils, flowers, tea, coffee, protein meals, biodiesel, honey, fruits and nuts

Technology

We develop software and mobile applications as well as market those produced by third parties.

"Trade Solutions"
